
NEW WATERBASED BRIGHT TRAPPABLE METALLICS

ACTEGA WIT is pleased to introduce a new and improved line of bright metallic gold formulations. These inks exhibit excellent brilliance, coverage, and long term stability on the shelf and in the press. In addition, the trap quality is the finest on the market today.

WML081671 Gold 871 WML081672 Gold 872 WML081673 Gold 873
WML081674 Gold 874 WML081675 Gold 875 WML081676 Gold 876
WML080657 Silver 877

Typical Properties:

- Good rub resistance
- Excellent stability
- Excellent resolubility
- Accepts second down inks extremely well
- Full line of colors available
- Viscosity 18-23" #3Z
- pH 7.7 – 8.3

Recommended Reduction:

Adjust viscosity with water only.

Application Recommendation:

Apply using a 3.4 bcm anilox minimum.

As with all materials, results may vary according to practices and conditions at your location. This information is provided as a guideline, and does not constitute a warranty. Suitability must be verified in a production environment.
